

CENSUS OF MISSOURI PUBLIC WATER SYSTEMS 2019

Missouri Department of Natural Resources
Division of Environmental Quality
Water Protection Program
Public Drinking Water Branch

PREFACE

The Missouri Department of Natural Resources is pleased to publish the 2019 edition of the annual Census of Missouri Public Water Systems. This publication provides detailed information for Missouri public water systems including information regarding supply capacity, source water type, population served, select monitoring results, and types of treatment being used. The department hopes this publication will serve as a useful reference for anyone needing information about a Missouri public water system.

While the Census provides summary information about individual water systems, additional resources are available. Our Annual Compliance Report of Missouri Public Drinking Water Systems lists violations by individual water systems as well as statewide data for the calendar year and is available at: dnr.mo.gov/env/wpp/fyreports/index.html

In addition, the complete results of all the chemical analyses taken at public water systems are on file at the office of the Missouri Department of Natural Resources' Public Drinking Water Branch. This information is also available online on our Drinking Water Watch webpage and can be viewed at: <https://dnr.mo.gov/DWW/>.

Also, individuals can learn more about their water system by accessing their community water systems' Consumer Confidence Report at: <https://dnr.mo.gov/ccr/index.html>.

For questions about this document you may call the department's Public Drinking Water Branch at 800-361-4827 or 573-751-8526.

II. STATISTICAL INVENTORY INFORMATION

STATISTICAL INVENTORY INFORMATION INTRODUCTION

The statistical inventory information section contains two tables. The first table gives the number of regulated systems by region and system type. The second table contains system totals and population totals by source type.

Number of Regulated Systems By Region and System Type

Region	Number of Community Systems	Number of Nontransient, Noncommunity Systems	Number of Transient, Noncommunity Systems	Total Number of Systems
KANSAS CITY REGIONAL OFFICE	280	12	70	362
NORTHEAST REGIONAL OFFICE	193	13	8	214
SOUTHEAST REGIONAL OFFICE	276	57	180	513
SOUTHWEST REGIONAL OFFICE	480	99	725	1,304
ST. LOUIS REGIONAL OFFICE	201	36	117	354
Total Systems	1,430	217	1,100	2,747

Community Water System Populations

Source Type		Total Number of Systems	Total Population Served
Primary Groundwater			
	Systems using Groundwater	1,053	1,851,453
	Systems using Groundwater Under Direct Influence	3	12,425
	Total for Primary Groundwater Systems	1,056	1,863,878
Primary Surface Water			
	Systems using Surface Water - Streams	59	2,436,083
	Total for Primary Surface Water Systems	59	2,436,083
Secondary			
	Secondary System using Groundwater	153	185,740
	Secondary System using Groundwater Under Direct Influence	3	15,375
	Secondary System using Surface Water	159	890,057
	Total for Secondary Systems	315	1,091,172
Grand Total		1,430	5,391,133

III. COMMUNITY WATER SYSTEM INVENTORY INFORMATION

COMMUNITY WATER SYSTEM INVENTORY INFORMATION

INTRODUCTION

KEY TO CODES AND ABBREVIATIONS

The community water system inventory information section contains data on community public water systems regulated by the Missouri Department of Natural Resources' Public Drinking Water Branch. A community public water system serves at least 15 service connections and is operated on a year-round basis or regularly serves at least 25 residents on a year-round basis (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). These systems include, but are not limited to, cities, water districts, subdivisions, mobile home parks and institutions.

Community water system inventory information provides basic information such as the required water system operator level and the required distribution system operator level, the year the system began providing water, the ownership type, the number of people served and the number of service connections. These systems are divided by type of community into three alphabetical lists. The first list contains city systems, the second list contains water district systems and the third list contains subdivision, mobile home park, institution and miscellaneous systems. This section also provides a list of systems that sell water and whom they sell to, as well as a list of systems that buy water and whom they buy from.

AVG = Average
MGD = Million Gallons per Day

DISTRIBUTION SYSTEM OPERATOR LEVEL (Listed second, if available under Operator Level, Example: "A1" or "1"):

- 1 – Requires a minimum of one-half year of distribution operations experience. 2 – Requires a minimum of 1 year of distribution operations experience.
- 3 – Requires a minimum of 3 years of distribution operations experience.

Both the water system operator level and the distribution systems operator level for community public water systems are classified according to system capacity, source of water, character of water, character of water being produced, complexity of treatment and other physical conditions that may affect a system. The department uses this classification system to determine the certification level necessary for the chief operator to supervise the operation of a facility (Missouri Safe Drinking Water Regulations 10 CSR 60-14.010).

OWNER TYPE: F – Federal Government P – Private
 S – State Government L – Local Government

SOURCE WATER PERCENTAGES:

PCT GRD = Percent of Source that is Groundwater
PCT PUR GRD = Percent of Source that is Purchased Groundwater
PCT PUR SUR = Percent of Source that is Purchased Surface Water
PCT SUR = Percent of Source that is Surface Water
PCT GW UNDER INFL = Percent of Source that is Groundwater under influence of Surface Water
PCT PUR GW UND INFL = Percent of Source that is Purchased Groundwater under influence of Surface Water

IV. NONCOMMUNITY WATER SYSTEM INVENTORY INFORMATION

NONCOMMUNITY WATER SYSTEM INVENTORY INFORMATION

INTRODUCTION

The noncommunity water system inventory information section contains data on noncommunity public water systems regulated by the Missouri Department of Natural Resources' Water Protection Program, Public Drinking Water Branch. There are two types of noncommunity public water systems. One type of noncommunity public water system is a transient noncommunity public water system. This is a public water system that is not a community water system, which has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least sixty days out of the year (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). This means that for the most part, the population changes daily. These systems include, but are not limited to, recreational areas, restaurants, highway rest areas, hotel/motels, campgrounds, etc. The second type of noncommunity public water system is a nontransient noncommunity public water system. This is a public water system that is not a community water system and that regularly serves at least 25 of the same persons over six months per year (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). This means that for the most part, the same population returns daily to the facility. These systems include, but are not limited to, factories, large businesses and industries, schools, etc.

Noncommunity water system inventory information contains a complete listing of active noncommunity water systems. This list contains the system name, county of location, system identification number, system type and season begin and end dates. The noncommunity listing is first by county and then alphabetical within the county.

Noncommunity Water Systems

County	Water System Name	ID Number	Population	System Type	Date Season Begins	Date Season Ends

VII. CHEMICAL ANALYSES OF COMMUNITY WATER SYSTEMS

CHEMICAL ANALYSES OF COMMUNITY WATER SYSTEMS

INTRODUCTION

KEY TO CODES

The chemical analyses of community water systems section contains data on inorganic chemical (IOC) test results. Under Missouri's Public Drinking Water Regulations (10 CSR 60-4), systems utilizing surface water sources in whole or in any part are required to submit water samples every year for IOC analyses while those systems utilizing only groundwater sources are required to submit samples once every three years. All systems are required to sample annually for nitrates. These analyses are performed by the Missouri Department of Natural Resources' laboratory. Results are given in this section for a group of common IOCs that each community system tests for, and the value provided represents the most recent sample for the chemical. If no result is listed, the water system has never been sampled for the specified chemical. This may be because the water system is newly activated, or the water system has recently been reclassified as a community water system.

Below is a list of chemicals included in this section. In parentheses behind some of the chemicals are suggested upper limits or regulatory maximums given in Milligrams Per Liter. In addition to the below named chemicals, analyses was also completed for the following inorganic chemicals: Arsenic, Barium, Cadmium, Chromium, Lead, Mercury, Selenium, and Thallium. The complete results of all of the chemical analyses are on file in the office of the Missouri Department of Natural Resources' Public Drinking Water Branch, and can be viewed at dnr.mo.gov/DWW/. Results that are below the detection limit are marked as "ND".

AL – Aluminum (200.0–500.0)	ALK – Alkalinity, Total as CaCO ₃
CA – Calcium	CL – Chloride (250.0)
CU – Copper (1000.0)	F – Fluoride (2.0)
FE – Iron (300.0)	K – Potassium
MG – Magnesium	MN – Manganese (50.0)
NA – Sodium	NO ₃ – Nitrate (10.0)
PH – pH	SO ₄ - Sulfate (250.0)
TDS – Total Dissolved Solids (Total Filterable Residue) (500.0)	TH – Total Hardness

In the following results, chemicals are listed in terms of either Milligrams per Liter (parts per million), Micrograms per Liter (parts per billion), or, in the case of PH, pH units. The chemicals are measured as follows:

Milligrams per Liter (mg/L)		Micrograms per Liter (ug/L)
ALK – Alkalinity, Total	NA - Sodium	AL - Aluminum
CA – Calcium	NO ₃ - Nitrate	CU - Copper
CL - Chloride	SO ₄ - Sulfate	FE - Iron
F - Fluoride	TDS – Total Dissolved Solids	MN - Manganese
K - Potassium	TH – Total Hardness
